

NITHISHKUMAR S

Full Stack Developer | Python | React | ERP Systems
Chennai, India | +91-9360167108 | snithish006@gmail.com

EXECUTIVE SUMMARY

Dedicated Project Associate with over 2 years of experience in architecting and delivering government-grade ERP, backend, and security systems. Expertise spans across Python, PostgreSQL, and REST API development with a strong focus on high-availability infrastructure (Patroni, ETCD) and microservices. Proven track record in executing the full SDLC within Agile environments, ensuring robust production deployments and system security.

TECHNICAL SKILLS

Languages: Python, JavaScript, C, C++, SQL

Frontend: React.js, Angular, HTML5, CSS3, XML

Backend & ERP: Node.js, Odoo ERP, REST APIs, Microservices, API Integration, System Design

Database: PostgreSQL, Query Optimization, Replication, Failover Configuration

Infra: Linux Admin, Nginx, Patroni, ETCD, Keepalived

Security: Burp Suite, AppScan, WebInspect, OWASP, Vulnerability Assessment

Practices: Agile, SDLC, Performance Optimization

PROFESSIONAL EXPERIENCE

Project Associate | C-DAC, Chennai Oct 2024 – Present

- Engineered scalable ERP and backend systems using Python and Odoo for government healthcare and education sectors.
- Lead developer for the Automated Port Access & Control System, utilizing Node.js and PostgreSQL.
- Optimized SQL queries to handle high-volume transactional data, improving system responsiveness
- Integrated complex government APIs including ULIP, VAHAN, and SBI Payment Gateway for seamless data exchange.
- Developed microservices for workflow automation, reducing manual data processing time significantly.
- Implemented HA infrastructure with Patroni and Keepalived to ensure 99.9% system uptime.
- Authored comprehensive technical documentation (SRS, FRS) and API references for internal and stakeholder use.

Security Testing Trainee | STQC — MeitY, Gov. of India Oct 2023 – Sep 2024

- Conducted vulnerability assessments on high-profile systems like GEPNIC using Burp Suite and WebInspect.
- Collaborated with development teams on OWASP compliance remediation within Agile sprint cycles.

PROJECTS

Automated Port Access & Control System (APACS)

A microservices-based platform for gate automation. Integrated React.js frontend with a Node.js backend and multi-government API gateways. Deployed using Docker with a robust CI/CD pipeline.

Chest X-Ray TB Diagnosis System

Developed an ML-assisted detection tool using Python. Focused on hardened Linux/Apache production deployment and system architecture design for healthcare reliability.

School ERP System

Full-stack Odoo implementation including database replication and failover strategies. Managed the entire SDLC from initial requirements gathering to final production deployment.

EDUCATION

B.Tech in Information Technology — St. Joseph's Institute of Technology, Chennai (2019–2023) | CGPA: 7.67

HSC — Sydai Sa Duraisamy Matric Hr Sec School (2018–2019) | 67%

SSLC — Velammal Vidhyalaya CBSE School (2016–2017) | 82%

CERTIFICATIONS

- CCNA — Elysium Academy
- Python Programming — NSIC
- Fundamentals of Digital Marketing — Google
- UI/UX Design — NSIC
